

Certificate & Advanced Training Programs

The Illinois Pharmacists Association (IPhA) is a licensed partner to provide the APhA Certificate & Advanced Training Programs listed below.

APhA's ***Pharmacy-Based Cardiovascular Disease Risk Management*** is an innovative and interactive certificate training program that explores the pharmacist's role in cardiovascular disease risk management. This practice-based activity is the first step for pharmacists interested in learning the essential skills to successfully assess risk, promote cardiovascular disease prevention, and encourage patient adherence to therapy.

Upcoming Programs: Sunday, April 14, 2019 - Edwardsville, IL

Online Registration is now closed. Please contact the IPhA Office at 217-522.7300 during business hours to check for available seats. Please note there is 12 hours of pre-study work that must be completed before attending the live session on Sunday, April 14, 2019.

APhA's ***The Pharmacist and Patient-Centered Diabetes Care*** Certificate Training Program is a newly revised, intensive educational experience designed to equip pharmacists with the knowledge, skills, and confidence needed to provide effective, evidence-based diabetes care. Five self-study modules provide comprehensive instruction in current diabetes concepts and standards of care. The live seminar incorporates case studies and hands-on skills training focused on the situations most likely to be encountered—as well as the services most needed—in community and ambulatory care practice settings. Participants will gain experience evaluating and adjusting drug therapy regimens for patients with type 1 and type 2 diabetes, counseling patients about lifestyle interventions, analyzing and interpreting self-monitoring of blood glucose results, and assessing the overall health status of patients to identify needed monitoring and interventions.
